

Get Inspired #1

the 5 essential tools for remote work.

5

Reasons to use Microsoft Teams instead of Email

1- Internet connection

To be productive, preferably use a fixed or mobile Internet connection of 10 megabits per second.
Use fixed networks and WiFi as a priority for voice and data, so as not to overload mobile networks

2-Your workstation

Remote work requires a comfortable workspace (desk, armchair, lighting, plants, etc.) but above all computer equipment such as a desktop computer, tablet or mobile phone – Android or iOS smart phone in order to take advantage of the best applications.

Accessories are essential to ensure better concentration: a headset and a multifunction printer.

3- Chat, audio-video conferences

Microsoft Teams, the hub for teamwork in Office 365

-  Chat, calls & meetings for today's teams
-  Integrated Office 365 apps
-  Customizable and extensible
-  Enterprise security, compliance & manageability

Regarding the communication method to adopt between the members of your remote team, preferably choose instant messaging software and video services such as Microsoft Teams. Why? Instant messaging allows you to communicate quickly with your colleagues, while voice and video services are great for longer conversations, such as meetings. In fact, an initial investment in chat services can even reduce future costs related to calls and meetings.

Scheduling regular meetings and sticking to pre-established schedules can be as important as providing the required flexibility, especially when it comes to mitigating potential disruption caused by telework.

4-Collaborative Tools

When implementing your telework program within your company, be it a VSE, an SME or a startup, it is important to invest in collaborative software that makes it easier to store, organize and share files. a necessary practice in collaboration: You will have your teams and yourself access to documents regardless of the environment.

Microsoft Office 365 offers a complete pack of collaborative tools including Outlook (messaging), Sharepoint (document sharing and modification in real time), Yammer (corporate social network) in addition to all office applications (Word, Excel, Power point).

Also choose software that makes it easy to create notes like OneNote to answer questions and record updates directly on the document so that the whole team can benefit.

5- Dynamics 365 Business Applications

Finally, in businesses of all sizes, billing, customer relationship management, payroll, production management, etc. applications are at the heart of our working days. Even though many companies have migrated to the cloud and access these applications in SaaS (Software as a Service) mode, the majority of business applications remain in computer rooms within companies.

Dynamics 365 is a set of smart business apps that help you manage your entire business and get better results with predictive information generated by AI.

That can help you transform your organisation without silos and without limits
